

A NEW TAKE ON THE CLASSIC REED DIFFUSER

ScentAir is pleased to offer a revolutionary new take on the classic oil reed diffuser. Introducing ScentSticks™ by EnviroScent™. These pre-scented sticks deliver a consistent level of scent that outperforms traditional liquid-based reed diffusers and are perfect for scenting small spaces.

ScentSticks can be prominently displayed or tucked away into existing décor items or plants, but their fragrance will be noticed immediately. They are completely dry to the touch and do not require messy oils that can spill or damage furniture. They are pre-soaked with the same high-quality fragrances found in our ScentWave scent delivery systems. ScentSticks are available in over a dozen scents and pastel colors, making them as beautiful to look at as they are to smell.
